-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The status of the claims is as follows:

Claims 2, 8, 11, and 13 have been cancelled; and

Claims 1, 3-7, 9, 10, and 12 are herein addressed below.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 3-7, 9, 10, and 12 are rejected under 35 U.S.C. 102(e) as being anticipated by Galer (203/0213179 A1). Galer discloses a window assembly comprising a window (12) having an opening (15), an L-shaped flange (18, paragraphs 0008 and 0009 discuss the L-shape) bonded/adhesive (paragraphs 0012 and 0013) attached to an inside (inside/outside is relative since the claims fail to recite inside or outside with respect to what) lower portion of the window (12) and formed of metal or plastic (paragraph 0012), wherein the flange (18/218 as shown in Figure 6) has a rounded/contoured region along a top portion and the flange (18) extends substantially at a bottom edge of the opening (Figure 2) or extends slightly within the opening (flange 218 in Figure 6).

Art Unit: 3634

The applicant's arguments have been considered but are not deemed persuasive. It appears that the applicant's arguments are more limiting than that of the claims. It appears that if the applicant included the following language or something similar, then it would appear to read over the art of record: that the entire upper surface of the flange is at a higher elevation relative to the bottom edge of the opening and that the contoured upper surface comprises a central region that is lower than side portions. The term "contoured" would broadly read on a flat surface adjacent a flat opening.
